Summary

Full-Stack Software Engineer with 5+ years of experience delivering production-grade applications across fintech and insurtech domains. Hands-on expertise in Angular, React, Flutter on the frontend and Java / Spring Boot microservices on the backend — with practical exposure to event-driven architectures using Kafka and Redis. Track record of owning features end-to-end: from UI design through API development to deployment, across banks (TEB), insurance carriers (Mapfre, Bupa Acıbadem), and aggregator platforms.

Work Experience

Senior Software Engineer, Compile Yazılım (Mapfre Sigorta) Mar 2025 – present

- Developing Medigo — Mapfre Sigorta's unified insurance platform — consolidating TSS (Supplementary Health) and ÖSS (Private Health) sales, post-sales, and policy lifecycle management under a single Angular + Java application.
- Built and maintained responsive Angular frontends integrated with Java and PL/SQL backends, improving UI performance and reducing policy processing time.
- Delivered features across multiple insurance product lines serving thousands of daily active users.
- Led Angular major version upgrades across the platform, ensuring compatibility and modernizing the codebase.
- Integrated SonarQube into the CI pipeline; defined and enforced code quality rules and coverage thresholds across the team.
- Collaborated in Agile Scrum teams; contributed to sprint planning, daily stand-ups, and peer code reviews.

Software Engineer – Individual Loans (KrediJet), TÜRK EKONOMİ BANKASI (TEB) June 2024 – Mar 2025

- Modernized KrediJet — TEB's loan origination platform — migrating legacy monolithic PL/SQL modules to Java microservices, improving maintainability and system stability.
- Developed and optimized end-to-end loan workflows covering personal, housing, and auto loan products.
- Built branch-facing credit application screens used directly by bank staff to process customer loan requests.
- Strengthened backend reliability with JUnit test coverage, reducing critical production incidents.
- Integrated SonarQube for static code analysis; enforced quality gates and reduced code smells across the codebase.
- Delivered sprint-based features in a CI/CD pipeline using Jira, Git, and automated builds.

Freelance Full-Stack Engineer, Ming Teknoloji May 2024 – Oct 2024

- Architected and delivered Ming — a cross-platform application with a React + Next.js web frontend and Flutter mobile app, backed by Java Spring Boot microservices.
- Implemented event-driven communication between services using Kafka and session/cache management with Redis.
- Deployed to production with CI/CD pipelines; sole engineer responsible for end-to-end delivery.

Software Engineer, FYK Bilgi Teknolojileri Dec 2020 – June 2024

- Delivered 5 production applications across insurance and e-learning sectors for major clients including Bupa Acıbadem Sigorta, Garanti BBVA Emeklilik, and HDI Fibaemeklilik.
- **Bupa Acıbadem Sigorta** — Built APS (Intelligent Provisioning System), Self Service Portal, and Contracted Institutions modules using Angular and Java.
- **Garanti BBVA Emeklilik** — Developed dSales, a digital sales platform for retirement and insurance products.
- **HDI Fibaemeklilik** — Delivered FiPortal, an agent-facing portal built with Angular and Java backend.
- **Midgard** — Built a multi-platform insurance aggregator application using Flutter (mobile) and Java backend.
- **İyiGo** — Developed a cross-platform e-learning application with React (web) and Flutter (mobile).
- Set up GitLab CI/CD pipelines across projects, automating builds and deployments and reducing release cycle times.
- Integrated SonarQube into CI pipelines; defined code quality rules and coverage thresholds enforced across teams.

- Performed Angular and Flutter major version upgrades across multiple projects, maintaining backward compatibility.
- Developed reusable Flutter component packages shared across multiple project teams.

Software Engineering Intern, Bilicra

June 2020 – Sept 2020

- Built a React Native mobile application for IoT-enabled smartwatches designed for children.

Education

EGE UNIVERSITY, B.Sc. in Computer Engineering – Izmir, Turkey

2016 – 2021

- GPA: 3.12 / 4.00
- Thesis: Text similarity detection using image processing and natural language processing techniques.
- Relevant coursework: Machine Learning, Artificial Intelligence, Design Patterns, Algorithms.

Skills

Backend: Java, Spring Boot, Microservices, Kafka, Redis, RESTful API, PL/SQL, PostgreSQL, JUnit

Frontend: Angular, React, Next.js, TypeScript, JavaScript, Flutter, Dart, Redux, JSF

DevOps & Tools: Git, GitLab CI/CD, SonarQube, Jira, ESLint, Agile Scrum

Languages

Turkish: Native

English: Intermediate
